Proactive Frontend Developer with 4 years of experience architecting and optimizing scalable web applications in React and Angular. Proven ability to lead feature development, foster cross-functional communication, and deliver high-performance solutions in complex domains (ERP, Public Transport). Author of an open-source npm library (skeleton-styler). Passionate about minimizing technical debt and crafting seamless user experiences.

EDUCATION

Ho Chi Minh City University of Technology - VNU HCM
Major: Computer science GPA: 7.5 / 10

CERTIFICATIONS

Toeic: 585

SKILLS

- Frameworks & Libraries:** ReactJS (19), NextJS, Angular (16 - 19), RxJS, Axios.
- State Management:** Redux Toolkit, NgRx, Jotai, Context API.
- UI & Styling:** Tailwind CSS, Bootstrap, Material UI, SASS/SCSS, ng-zorro.
- Architecture & Core Skills:** Feature-Sliced Design (FSD), Component-Driven Architecture, Performance Optimization, Advanced State Management, Web Accessibility
- Backend & Databases:** NodeJS, ExpressJS, NestJS, MongoDB, PostgreSQL.
- Tools & DevOps:** Git, Docker, Trivy (security scanning).
- Software Engineering:** Data Structures and Algorithms, OOP, Design Patterns (Builder, Facade, Observer), Agile/Scrum.

EXPERIENCE

Frontend developer VinSmart Future | Dec 2025 - Now

- Developed web interfaces for bus management systems within the group's public transport ecosystem.
- Spearheaded the migration of enterprise platforms (Vinbus Dashboard, Map) from Angular 11 to 19, resolving critical security vulnerabilities (Trivy) and ensuring system compliance.
- Contributed to the deployment of smart software solutions for passenger services and public transport coordination.

Frontend developer Golabs | Aug 2025 - Nov 2025

- Developed and enhanced the web UI for a bus management system, focusing on new features and user experience.
- Maintained, refactored, and debugged system features to ensure high availability and stability.
- Researched and applied new techniques to optimize system performance and efficiency.

Frontend developer Xperc | Sep 2022 - Aug 2025

- Developed responsive web interfaces for a commercial resource and personnel management system.
- Architected and built a library of highly reusable UI components, accelerating development cycles and ensuring visual consistency across the platform.
- Applied advanced software design patterns to architect complex features—such as implementing global application skeleton loaders and dynamic dashboard reordering logic—significantly reducing bug rates and enhancing code maintainability.
- Collaborated closely with cross-functional teams in Agile/Scrum environments, driving clear communication, daily stand-ups, and successful sprint deliveries.

Intern Designveloper | June 2022 - Aug 2022

- Researched and developed a technology-based blog project independently.

PROJECTS

Vinbus - MiniApp

Oct 2025 - Present

- Developed a Mini App on the React 19 platform, integrated into Vingroup's V-app Super App via the @vsf-miniapp framework. Built interactive maps and navigation features leveraging GSM Map SDK for real-time route searching and public transport trip planning.
- Managed complex application states with Jotai and optimized UI/UX using the self-authored skeleton-styler library.
- Technologies: React 19, @vsf-miniapp, gsm-map-sdk, TypeScript, Jotai, skeleton-styler.

GoAFC

Aug 2025 - Present

- Modernized the Web UI for the Ho Chi Minh City bus management system, upgrading the stack to Angular 19.
- Implemented key features including global search, dark mode, and an administrative dashboard for route management.
- Technologies: Angular 19, TypeScript, RxJS, Bootstrap, ng-zorro.
- Website: afc.golabs.vn

Vinbus & BusMap Modernization

Dec 2025 - Jan 2026

- Spearheaded the comprehensive migration of multiple enterprise platforms (Vinbus Dashboard, Vinbus Map, and BusMap) from Angular 11 to Angular 19. Resolved critical security vulnerabilities identified by Trivy, ensuring the systems comply with enterprise-grade security standards.
- Refactored core modules and updated dependent libraries to optimize performance and ensure cross-version compatibility post-migration.
- Technologies: Angular 19, RxJS, TypeScript, Trivy.

XCORP Management System

Sep 2022 - Aug 2025

- Developed the Frontend for a comprehensive ERP platform focusing on resource, project, and performance management. Built complex modules such as Gantt charts for task management, OKR/KPI tracking, and automated logwork systems.
- Managed large-scale application states efficiently using NgRx and integrated Froala-based text editors for document management.
- Technologies: Angular 16, NgRx, TypeScript, Tailwind CSS, ng-zorro, Froala Editor.
- Website: xcorp.app

Skeleton-styler

Sep 2025 - Nov 2025

- Authored and published an open-source npm library designed to simplify the creation of highly customizable skeleton loaders, plus a companion visualizer for generating and exporting skeleton layouts.
- Engineered a maintainable architecture that allows developers to integrate high-fidelity loading states with minimal configuration.
- Technologies: React, TypeScript, Tailwind CSS.
- Package: npmjs.com/package/skeleton-styler | Demo: skeleton-styler.vercel.app

Education System

Dec 2024 - May 2025

- Built a Full-stack online learning platform featuring course moderation, enrollment systems, and an AI-powered chatbot.
- Integrated MoMo payment gateway and managed Big Data storage using Hadoop HDFS.
- Technologies: Next.js, NestJS, PostgreSQL, Hadoop HDFS, LangChain, LLaMA 3.2, FAISS.

Other side projects

2022 - 2026

- **English Master:** vocabulary-learning app with flashcards, spaced repetition and note-taking (ReactJS, Redux Toolkit, Tailwind CSS) - niz-vocabulary.vercel.app
- **Diary Calendar:** Vietnamese perpetual calendar (1900 - 2100) with lunar - solar conversion and an integrated personal diary (Next.js, TypeScript, Tailwind CSS) - viet-cal.vercel.app
- **Wallio - Expense Manager:** personal finance tracker with multi-wallet management, budgets and chart-based analytics (React, Redux, Chart.js) - wallio-app.vercel.app
- **Go Travel Planner:** trip itinerary planner with timeline view, checklists and map integration (React, Redux, Google Maps API) - go-travel-planner.vercel.app
- **Simple blog:** full-stack blog platform built during the internship at Designveloper (ReactJS, ExpressJS, MongoDB).
